SPRINGER INTERNATIONAL

Theoretica Chimica Acta

A Journal for
Structure, Dynamics and Radiation

Founded and edited in 1962 by H. Hartmann from Vol. 1 (1962) to Vol. 66 (1984).
As of Vol. 67 (1985) edited by K. Ruedenberg et al.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0040-5744, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Arponen JS: Independent-cluster methods as mappings of quantum theory into classical mechanics 149
Arponen JS, Bishop RF: A holomorphic representation approach to the regularization of model field theories in coupled cluster form 289

Balková A: → Kucharski SA
Balková A, Kucharski SA, Meissner L, Bartlett RJ: A Hilbert space multi-reference coupled-cluster study of the H_4 model system 335
Bartlett RJ: Coupled-cluster theory in atomic physics and quantum chemistry 71
Bartlett RJ → Balková A
Bartlett RJ → Kucharski SA
Bartlett RJ → Rittby CML
Barysz M, Monkhorst HJ, Stolarczyk LZ: Fock-space coupled-cluster method. A study of the electronic spectra of model π-electron systems 483
Bishop RF: An overview of coupled cluster theory and its applications in physics 95
Bishop RF → Arponen JS
Bishop RF, Parkinson JB, Xian Y: A coupled-cluster study of the ground-state energy and properties of an anisotropic quantum spin lattice model exhibiting antiferromagnetism in various phases 181
Blundell SA, Hartley AC, Liu Z, Mårtensson-Pendrill A-M, Sapirstein J: Calculations of the parity non-conserving $6s \rightarrow 7s$ transition in caesium 257
Bottcher C → Morrison JC
Bottrell G → Morrison JC

Čársky P, Hubač I: Restricted Hartree–Fock and unrestricted Hartree–Fock as reference states in many-body perturbation theory: a critical comparison of the two approaches 407
Chaudhuri R → Mukhopadyay D
Cížek J: Origins of coupled cluster technique for atoms and molecules 91
Colle R, Salvetti O: A representation of the exchange operator useful for large molecules 63

Hartley AC → Blundell SA
Hubač I → Čársky P

Indelicato P, Mohr PJ: Quantum electrodynamic effects in atomic structure 207

Jankowski K, Paldus J, Piecuch P: Method of moments approach and coupled-cluster theory 223
Jarque C → Novaro O

Kaldor U: The Fock space coupled cluster method: theory and application 427
Kelly HP → Liu ZW
Klessinger M, Pötter T, Wüllen C von Semiempirical valence-electron calculations of excited state geometries and vibrational frequencies 1
Koča J: A mathematical model of the logical structure of chemistry. A bridge between theoretical and experimental chemistry and a general tool for computer-assisted molecular design. I. An abstract model 29

Koča J: A mathematical model of the logical structure of chemistry. A bridge between theoretical and experimental chemistry and a general tool for computer-assisted molecular design. II. Conformational and reaction changes 51
Kucharski SA → Balková A
Kucharski SA, Balková A, Bartlett RJ: Performance of single-reference coupled-cluster methods for quasidegenerate problems: The H_4 model 321
Kucharski SA, Bartlett RJ: Recursive intermediate factorization and complete computational linearization of the coupled-cluster single, double, triple, and quadruple excitation equations 387
Kümmel H: Origins of the coupled cluster method 81
Kutzelnigg W: Error analysis and improvements of coupled-cluster theory 349

Liu Z → Blundell SA
Liu ZW, Kelly HP: Application of the coupled-cluster theory to atomic frequency-dependent polarizabilities 307

Mårtensson-Pendrill A-M → Blundell SA
Meissner L → Balková A
Mohr PJ → Indelicato P
Monkhorst HJ → Barysz M
Morrison JC, Bottcher C, Bottrell G: Spline calculations of the photoionization oscillator strengths of H_3^+ 245

Mukherjee D → Mukhopadhyay D
Mukhopadhyay D, Mukhopadhyay S, Chaudhuri R, Mukherjee D: Aspects of separability in the coupled cluster based direct methods for energy differences 441
Mukhopadhyay S → Mukhopadhyay D

Novaro O, Jarque C: Potential energy surface for the $Pd-H_2$ system: Comparison with matrix isolation experiments 19

Paldus J → Jankowski K
Parkinson JB → Bishop RF
Piecuch P → Jankowski K
Pötter T → Klessinger M

Rittby CML, Bartlett RJ: Multireference coupled cluster theory in Fock space 469

Salvetti O → Colle R
Sapirstein J → Blundell SA
Scuseria GE: Application of open-shell coupled cluster theory to the ground state of GaAs 215
Stolarczyk IZ → Barysz M

Wüllen C von → Klessinger M

Xian Y →Bishop RF
